Subject: RE: new PH data????
Date: 05/07/2008 08:33 AM

Hi Rob -

Here's the download I got from Sandy Browning:

"The remaining data sets include the R3B sediment and biota, outfall sediment traps, and Round 2 sediment archive samples for PCB congeners. We have a few alkylated PAHs coming in this week with validation to be concluded next week. After that, the SCRA for sediment and biota will be updated. I would say EPA and NOAA will receive the data around the 1st or 2nd week in June following the usual approval process."

Please let me know if you have any other questions!

thanks
valerie

Hey Valerie -- I'm trying to line up a QM update for Portland Harbor. I assume the R3 bioassay and sediment data have not yet been posted in QM format. Do you have a sense of when they may be available? Any other data sets slated for posting soon? If we (NOAA) can batch our updates it makes the process more efficient. Any info you can provide will be appreciated. Thanks!

-R
